THIMIRA KEERTHIWANSHA

DevOps Engineer Intern

Colombo, Sri Lanka | (+94) 76 7513 695 | tnirajaya2001@gmail.com
github.com/thimira20011 | thimira.tech | LinkedIn

Professional Summary

Information Systems undergraduate with hands-on experience in AWS cloud infrastructure, Linux administration, Docker containerization, and CI/CD automation using GitHub Actions. Deployed and managed an 11-container application stack with Nginx, Prometheus, and Grafana, and optimized a backend Docker image by 49%. Experienced in infrastructure monitoring, deployment automation, and troubleshooting, seeking a DevOps Engineering internship to contribute to reliable and efficient cloud environments.

Education

BSc (Hons) in Information Systems Expected Jul 2028

Sabaragamuwa University of Sri Lanka, Faculty of Computing

Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Distributed Systems, Software Engineering, Cloud Computing.

Technical Skills

Cloud & systems: AWS (Lightsail, S3), Azure, Linux (Ubuntu), Docker, Docker Compose, Nginx

Delivery: Continuous integration/continuous delivery (CI/CD), GitHub Actions, Git, Jira

Observability: Prometheus, Grafana, cAdvisor, Node Exporter, OpenTelemetry, Serilog

Backend & data: ASP.NET Core, .NET 10, PostgreSQL, PostGIS, Redis, SQLite

Testing & languages: k6, BenchmarkDotNet, unit testing, Python, C#, TypeScript, JavaScript

Selected Projects

NearU Infrastructure - AWS Lightsail Deployment Ongoing

Individual project | AWS Lightsail, Amazon S3, Docker, Nginx, Prometheus, Grafana

- Operate **11 Docker containers** on an AWS Lightsail Ubuntu VPS for the API, database, cache, routing, and monitoring; host the frontend on Vercel.
- Configure Nginx TLS 1.2/1.3 and automatic certificate renewal; enforce per-IP rate limits of **30 requests/second** with a burst buffer of 20.
- Monitor application and host metrics with Prometheus, Grafana, cAdvisor, and Node Exporter; track availability with Uptime Kuma.
- Store website photos in Amazon S3 object storage.
- Restrict database exposure to localhost and manage Docker networks and persistent volumes.

NearU - CI/CD, Testing & Container Optimization Nov 2025 - Aug 2026

Lead Developer & Scrum Master | 4-developer team | GitHub Actions, k6, BenchmarkDotNet

- Reduced the backend image by **49% (213 MB to 108 MB)** using Ubuntu Chiseled containers with a non-root, shell-less runtime.
- Automated GitHub Actions build, test, Docker image publishing, and deployment stages for the backend.
- Implemented a k6 scenario targeting **50 virtual users** and BenchmarkDotNet microbenchmarks for JWT generation, password verification, JSON processing, and filtering.
- Wrote unit tests for caching, ride-location verification, and ride-state transitions.

Repository: https://github.com/Nearu-Project-SUSL

Selected Projects (Continued)

GreenOps Intelligence Hub - Cloud Efficiency Monitoring Jan 2026 - Present

Individual project | .NET 10, Azure SDK, EF Core, Docker, Grafana

- Built a .NET BackgroundService to collect Azure VM/App Service CPU and memory telemetry every **60 seconds** and persist it with Entity Framework Core.
- Implemented Software Carbon Intensity calculations with a **12-region** carbon-intensity lookup and A+ to D resource-efficiency ratings.
- Integrated Prometheus metrics, Grafana dashboards, OpenTelemetry tracing, and Serilog logging in a Docker Compose stack.

Repository: https://github.com/thimira20011/GreenOps-Intelligence-Hub

Self-Hosted AI Agents - OpenClaw & Hermes Apr 2026 - Present

Individual project | AWS, Docker Compose, Telegram/GitHub APIs, SQLite

- Deployed OpenClaw on a 4 GB cloud VPS; resolved Docker Compose V1/V2 incompatibilities and runtime permission issues.
- Configured a fine-grained read-only GitHub token, persistent agent memory, and model-provider fallback routing for API rate limits.
- Deployed Hermes on AWS Ubuntu with a Docker-managed gateway, Telegram access, and SQLite-backed session history.

Technical write-up: Deploying a Production-Ready AI Gateway on a Cloud VPS

GridWalk AI - Multi-Agent Microgrid Recovery Oct 2026

AI logic & agent coordination | Team IGNITE | Jac/Jaseci, LLM APIs

- Developed the AI logic and agent coordination for fault monitoring and recovery planning in a graph-based microgrid prototype.
- Combined LLM-assisted recovery proposals with deterministic constraint validation.

Repository: https://github.com/Dileesha001/GridWalk-AI

Leadership Experience

Associate Technical Lead Oct 2026 - Present

AWS Student Builder Group, Sabaragamuwa University of Sri Lanka

- Coordinate technical delivery for workshops and events, including troubleshooting and hands-on lab design.

Graphic Designer & Volunteer May 2025 - Present

Rotaract Club, Sabaragamuwa University of Sri Lanka

- Create graphics for SDG campaigns, event flyers, and podcasts; volunteer on environmental projects.

Awards

- **1st Runner-Up, AI Hackathon 2026** - GridWalk AI, Team IGNITE; EESoc, University of Moratuwa, 17 Oct 2026.
- **1st Runner-Up, Aurora 2026 AI Ideathon** - ShadowSense Aurora; University of Sri Jayewardenepura, Jul 2026.
- **2nd Runner-Up, Pixel Pioneers Game Jam v1.0** - Knight Fury; IEEE Computer Society, SUSL, Jun 2026.

Certifications & Training

- **Continuous Integration and Continuous Delivery (CI/CD)** - IBM/Coursera, Sep 2026.
- **Scrum Fundamentals Certified (SFC)** - SCRUMstudy, Oct 2025.
- **DevOps Pre-Requisite Course; Docker Training Course for the Absolute Beginner** - KodeKloud, Feb 2025.
- **AI Fluency for Students** - Anthropic; **MCP Fundamentals for Building AI Agents** - Educative, Apr 2026.
