THIMIRA KEERTHIWANSHA

Software Engineering Intern

Colombo, Sri Lanka | (+94) 76 7513 695 | tnirajaya2001@gmail.com
github.com/thimira20011 | thimira.tech | LinkedIn

Professional Summary

Information Systems undergraduate with hands-on experience in full-stack software development using C#, ASP.NET Core, React, and PostgreSQL. Skilled in REST API development, authentication, real-time systems, and software testing, with experience leading a four-developer team using Agile/Scrum practices. Passionate about building scalable, reliable applications and seeking a Software Engineering internship to contribute to real-world development projects.

Education

BSc (Hons) in Information Systems Expected Jul 2028
Sabaragamuwa University of Sri Lanka, Faculty of Computing

Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Distributed Systems, Software Engineering, Cloud Computing.

Technical Skills

Languages: C#, TypeScript, JavaScript, Python, Java, Jac

Application development: ASP.NET Core, .NET 10, Entity Framework Core, REST APIs, React, Next.js, SignalR, FastAPI

Databases: PostgreSQL, PostGIS, MySQL, Redis, ChromaDB

AI systems: Jac/Jaseci, CrewAI, LLM APIs, vector search

Delivery & tools: Git, GitHub Actions, Docker, AWS (Lightsail, S3), Azure, Linux, Jira, Agile/Scrum

Selected Projects

NearU - Campus Marketplace & Ride Sharing Nov 2025 - Aug 2026
Lead Developer & Scrum Master | .NET 10, React, SignalR, Redis, PostGIS

- Led a 4-developer team, coordinating Jira sprints, code reviews, and Git branching for a full-stack campus platform.
- Reduced the backend container image by **49% (213 MB to 108 MB)** by migrating to non-root, shell-less Ubuntu Chiseled containers.
- Implemented real-time ride matching with SignalR and Redis pub/sub; enabled stateful reconnects for mobile clients during network interruptions.
- Developed location-aware queries using Entity Framework Core, NetTopologySuite, and PostGIS for proximity search and geofencing.
- Implemented role-based access control and JWT authentication with 15-minute access tokens and 7-day refresh tokens.
- Wrote unit tests for Redis caching, ride-location verification, and ride-state transitions; implemented k6 load tests and BenchmarkDotNet microbenchmarks.

Repository: https://github.com/Nearu-Project-SUSL

GridWalk AI - Multi-Agent Microgrid Recovery Oct 2026
AI logic & agent coordination | Team IGNITE (3 members) | Jac/Jaseci, LLM APIs

- Developed the core AI logic and coordinated agents for microgrid fault monitoring, recovery planning, and incident analysis.
- Integrated LLM-assisted recovery proposals with deterministic constraint validation in a graph-based microgrid simulation.
- Co-developed the team prototype, earning **1st Runner-Up at AI Hackathon 2026**, University of Moratuwa.

Repository: https://github.com/Dileesha001/GridWalk-AI

Selected Projects (Continued)

ShadowSense Aurora - AI Scam Detection May - Jul 2026

Team project | Python, FastAPI, React, TypeScript, ChromaDB, CrewAI

- Designed a 4-agent pipeline that combines linguistic, identity, and payload signals into a 0-100 Trust Score for freelance chat messages.
- Implemented ChromaDB vector search with all-MiniLM-L6-v2 embeddings to compare messages against **75+ known scam patterns**.
- Delivered a React/TypeScript Chrome extension that displays a live Trust Gauge in freelance chat interfaces.

Repository: https://github.com/thimira20011/ShadowSense-2026-Aurora

NearU - Cloud Infrastructure & Deployment Ongoing

Individual project | AWS Lightsail, Amazon S3, Docker, GitHub Actions, Prometheus, Grafana

- Operate **11 Docker containers** on AWS Lightsail for the API, databases, cache, routing, and monitoring; store website photos in Amazon S3 and host the frontend on Vercel.
- Automated GitHub Actions build and test gates before Docker deployment; configured TLS, rate limiting, and certificate renewal.

Self-Hosted AI Agents - OpenClaw & Hermes Apr 2026 - Present

Individual project | AWS, Docker Compose, Telegram/GitHub APIs, SQLite

- Deployed cloud-hosted AI gateways with Telegram/GitHub integrations; diagnosed Docker Compose compatibility and container permission issues.
- Configured scoped GitHub access, persistent agent memory, model-provider fallbacks, and SQLite-backed session storage.

Leadership Experience

Associate Technical Lead Oct 2026 - Present

AWS Student Builder Group, Sabaragamuwa University of Sri Lanka

- Coordinate technical delivery for workshops and events, including troubleshooting and hands-on lab design.

Graphic Designer & Volunteer May 2025 - Present

Rotaract Club, Sabaragamuwa University of Sri Lanka

- Create graphics for SDG campaigns, event flyers, and podcasts; volunteer on environmental projects.

Awards

- **1st Runner-Up, AI Hackathon 2026** - GridWalk AI, Team IGNITE; EESoc, University of Moratuwa, 17 Oct 2026.
- **1st Runner-Up, Aurora 2026 AI Ideathon** - ShadowSense Aurora; University of Sri Jayewardenepura, Jul 2026.
- **2nd Runner-Up, Pixel Pioneers Game Jam v1.0** - Knight Fury; IEEE Computer Society, SUSL, Jun 2026.

Certifications & Training

- **Continuous Integration and Continuous Delivery (CI/CD)** - IBM/Coursera, Sep 2026.
- **Scrum Fundamentals Certified (SFC)** - SCRUMstudy, Oct 2025.
- **DevOps Pre-Requisite Course; Docker Training Course for the Absolute Beginner** - KodeKloud, Feb 2025.
- **AI Fluency for Students** - Anthropic; **MCP Fundamentals for Building AI Agents** - Educative, Apr 2026.
